

RITE AID DRUG STORES Northeast, Ohio

Over a several year period, HGF designed numerous new drug stores for the Rite Aid Corporation throughout the northern half of Ohio.

In most cases, HGF designed modified versions of the standard Rite Aid prototype building in order to sensitively respond to the adjacent neighborhoods existing context or to meet municipal design guidelines.

HGF facilitated all municipal and state project approvals including presentation to Architecture Review Boards and Planning/Zoning Commissions. HGF worked closely with Rite Aid's Real Estate Department and local developers to assure a thorough well-orchestrated property review.
