

UNIVERSITY MEDNET CLINICS Northeast, Ohio

University Mednet has been a continuous client of Herman Gibans Fodor, Inc. for the past fifteen years. HGF's role has been to design facilities that keep pace with the various clinics' growth as well as plan for future expansion. All of the projects address the increasing challenges of the health care industry's competitive trend and accommodate technological advancements.

HGF has completed projects at the following University Mednet Clinics: Euclid Clinic; Mentor Clinic; Beachwood Clinic; Beachwood Urgent Care Center; Rockside Clinic; Madison Clinic; and the Mednet Physical Therapy Facility in Willoughby.

During the planning and design of all Mednet facilities, HGF worked closely with the facilities manager, doctors, nurses and administrative staff in order to obtain a full understanding of the project requirements. Spaces are designed to ensure patient comfort, staff efficiency, and general cost effectiveness.
